Currency Pairs

Autochartist Trade Ideas displays trade setups for these 18 currency pairs. You can use the **Currency Pairs** drop-down menu to select a specific one.

You can sort the currency pairs that have trade alerts by clicking the **Symbol** heading; this sorts the currency pairs in descending alphabetical order. Click **Symbol** again to sort in ascending alphabetical order.

Probability

You can also sort the trade alerts by their probability rating. Click the **Probability** heading to sort the currency pairs by their ascending probability rating. Click **Probability** again to sort the trade setups by their descending probability rating.

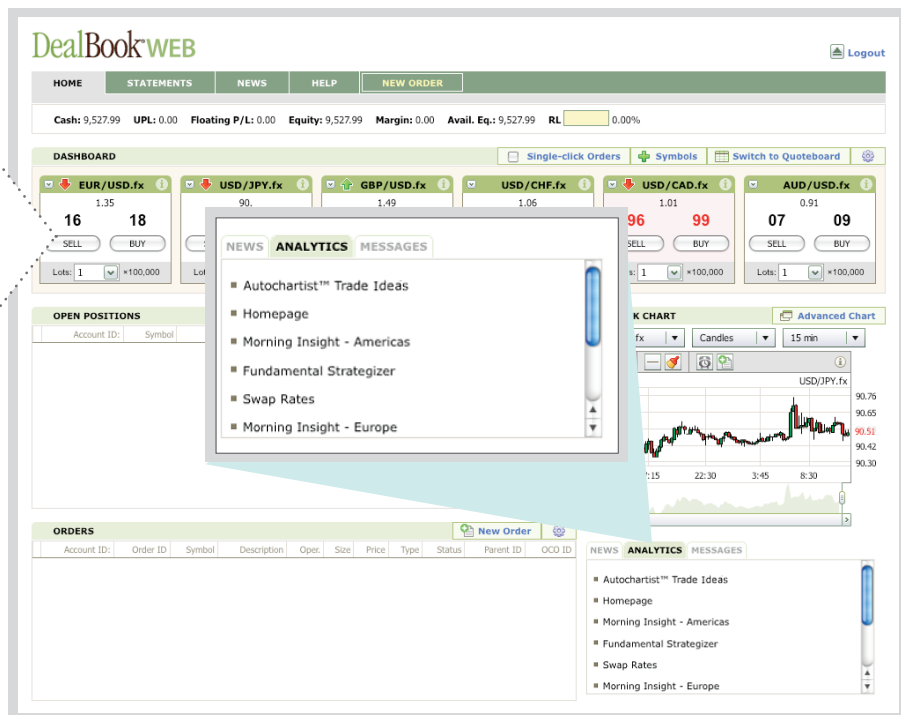

When you don't want to view a particular trade setup, you can click X in the Hide column to temporarily remove it from the list.
